250 Timbavati str, Moreleta Park

duwaine.co.za

0812463148

### Nationality

South-Africa

### Driving license

Yes

### Date of birth

1991/02/16

## PROFILE

Innovative Front-End Developer with 7 years experience building and maintaining responsive websites and applications. Using the latest design trends and tools to implement UX and UI and then to develop in the latest JS frameworks and libraries makes me passionate about the industry.

## EMPLOYMENT HISTORY

### Front-End Developer, InfoSlips

InfoSlips transforms paper documents into rich interactive and engaging experiences in the form of Payslips, Statements, daily trading notes etc. that delight and add value. As the Front-End Developer, my core activities include:

- Design and building stable and interactive document using Figma for the design and React for the development which include React latest technologies like: functional components, hooks and context for managing state.
- All documents are developed with a mobile first approach making sure the project works on all devices and screen sizes.
- Problem solving and bug finding.
- Developing email bodies for various email clients.
- Code reviewing of team members.
- Maintaining and updating projects on a daily basis.
- Working with Jira as agile management, with morning sprint standup and weekly sprint planning.
